Course outline, title, target audience and paragraph on how the course would benefit SBE Members

Interested in meeting with the members of SBE **in person**? Consider submitting an **educational presentation** for the Ennes Workshops. These one-day, technical workshops are held in several cities around the country annually. Ennes Workshops are designed to attract broadcast engineers and engineering management from within several hundred miles to attend this affordable, educational program. Presenters are selected based on providing a well balanced, informative and interesting program for those attending.

Title and abstract for a 45 minute presentation

A cost-effective and convenient way to get your message to the SBE Members is by presenting a Webinar by SBE. These are online seminars addressing subjects of interest to broadcast engineers that take place live, and are recorded for on-demand viewing. Each webinar typically lasts 60-90 minutes (some last up to three hours). A presentation is shown over the Internet and audio is heard through VoIP or by telephone using a phone conference.
